

# Module (HTML5) - 3

1. What are the new tags added in HTML5?

-> <article>

<aside >

<audio>

<canvas>

<command>

<video>

<nav>

Etc.

2. How to embed audio and video in a webpage?

-> 1. src This attribute stands for the source, which is very similar to the src attribute used in the image element. We will add the link to a video file in the src attribute.

2. type This is going to be video/mp4 because . mp4 is the format of the video we are using.

### 3. Semantic element in HTML5?

-> <article>

<aside>

<details>

<figcaption>

<figure>

<footer>

<header>

<main>

<mark>

<nav>

<section>

<summary>

<time>

### 4. Canvas and SVG tags

->

SVG

HTML Canvas

-SVG can be modified through script and CSS    - Canvas can be modified through script only

-SVG is vector based and composed of shapes.    -Canvas is raster based and composed of pixel
